

## Blackfrog Technologies has raised Pre-Series A investment of \$1.7 million

<https://www.big.venturecenter.co.in/black-frog/>

*Congratulations*

Blackfrog has raised a Pre-Series A investment of \$1.7 million from the Global Innovation Fund (GIF), Rainmatter by Zerodha, and the Manipal Education and Medical Group (MEMG). This funding will accelerate the development of three new cold chain products for diagnostics, pharma logistics, and clinical research—strengthening our commercial offerings and bringing them closer to their goal of becoming India’s market leader in medical refrigeration by 2030.

Blackfrog’s flagship product, Emvólio, is a compact, portable, and digitally enabled refrigeration system, engineered for medical-grade performance and compliance. It uses thermoelectric cooling, live temperature tracking, and data analytics to ensure traceability, precision, and stability across the cold chain.

GIF’s investment alongside Manipal Education and Medical Group and Rainmatter by Zerodha will help Blackfrog scale manufacturing, convert pilot projects into commercial orders, and develop new product lines for global markets.
